

New Project Awarded in Kingdom of Saudi Arabia (KSA) “5th Major Project Order in the Middle East”

Overseas affiliate SANKYU Saudi Arabia of Sankyu Inc. (Headquarters: Chuo-ku, Tokyo, President and Representative Director: Kimihiro Nakamura) has been awarded a maintenance contract at a petrochemical plant complex at Jubail Industrial City II in the Kingdom of Saudi Arabia (KSA) owned by Sadara Chemical Company (Sadara).

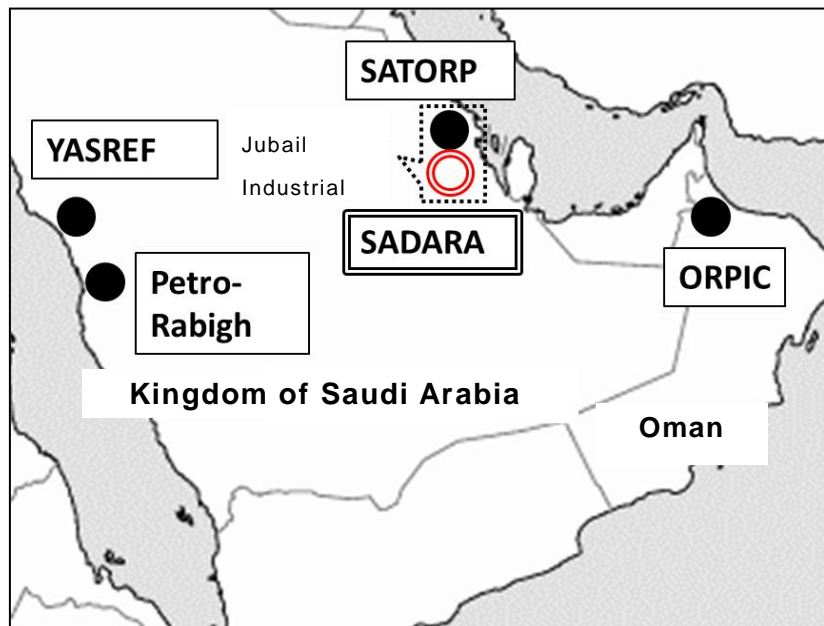

The contract covers preventive maintenance work on Sadara’s ethylene equipment, the Mixed Feed Cracker (MFC) and aromatics equipment, with opportunity to execute daily checks and repairs of the plant equipment, with the primary concern being process stability. Work under the contract began in June, 2019, and the contract term runs for 3 years, with an option to extend for 2 additional years.

In 2008, we penetrated the Saudi market with the maintenance and operation of petrochemical plants in Rabigh, KSA, and we began operations in Oman in 2016. In the last four regions SANKYU has entered, we have been engaged in logistics operations, operation support and daily maintenance, mainly in refineries and petrochemical plants. Since 2012, SANKYU has been conducting daily maintenance work at the SATORP refinery in Jubail Industrial City II, which has resulted in adding new achievements to our technical capabilities.

The SANKYU group will continue to focus on global development.

About Sadara

A joint venture between Saudi Arabia's national oil company Saudi Aramco and Dow Chemical Co., Ltd., established in the year 2011. It owns and operates the largest chemical complex in the world built in a single phase, with over 3 million metric tons of capacity per year in Jubail Industrial City II.
